I am a **Fullstack Software Engineer** with experience in **Java, Python, Typescript, Spring Boot, NestJS, Nodejs, Express, React** and **Nextjs.** I specialize in building responsive web applications that ensure smooth backend integration and enhance user experiences.

WORK EXPERIENCE

Co-Founder & Software Engineer - Drifto **July 2025 - Present**

- Architected and shipped the full **Spring Boot** backend as sole backend engineer, powering event management, authentication, and Paystack payment processing and security for 500+ users across live events with ~95% ticket fulfillment (400–500 attendees served).
- Engineered the responsive **Next.js/React** web MVP with design parity to the mobile app, sustaining 99.5% API uptime and cutting average response times to ~250ms.
- Led the full-stack lifecycle end-to-end: database schema desgn, RESTful APIs, payment infrastructure and security, and feature delivery taking the product from concept to a live, revenue-generating platform.

Software Engineer - Stalwart Crest Ltd [Remote] **September 2023 - Present**

- Engineered dynamic and user-friendly front-end applications using **React** and **Next.js**, improving overall user experience and cutting page load times by 25%.
- Strengthened backend security with **Spring Security**, reducing vulnerabilities by 15% and ensuring adherence to industry regulations.
- Optimized and maintained scalable Java-based backend systems with **Spring Boot**, increasing performance and successfully managing a 30% surge in user traffic through enhanced API integrations.

Backend Engineer – CSDC Solutions [Hybrid] **January 2025 - June 2025**

- Worked on and maintained a comprehensive government T**ax revenue system** using **Java**, implementing new features and resolving critical issues to streamline tax processing and boost system efficiency by 20%.
- Diagnosed and rectified persistent performance bottlenecks, ensuring regulatory compliance and enhancing transaction efficiency across large-scale deployments.
- Collaborated on a **Tourism system** for Lagos State using **Spring Boot** by implementing user-centric modules and integrating real-time data feeds, which increased user engagement by 15% and improved accessibility.
